                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Pred. No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Sequence 69,

Liu Profesome Res. 42070-2080(2005).

Liu FUNCTION: May act as an inhibitor of TGF-beta signaling.

LISUBCINIT: Interacts with TGFB1, TGFB2 and TGFB3.

LISUBCATION: Membrane; single-pass type I membrane protein (Probable). Secreted protein.

LISSUB SPECIFICITY: Expressed at highest levels in aorta, at intermediate levels in kidney and placenta and at lowest levels in brain, heart, liver, lung and skeletal muscle. Within the aorta, the strongest expression is found in the tunica media of the proximal ascending aorta, the descending thoracic aorta, the abdominal aorta and the coronary arteries. Within the kidney, expression is found in the interstitial cells.

LISTUILARITY: Contains I EGF-like domain.

LIRR (leucine-rich) repeats.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        Copyrighted by the UniProt Consortium, see http://www.uniprot.org/terms

Submitted (JUL-2004) to the EMBL/GenBank/DBBJ databases.
-- FUNCTION: May act as an inhibitor of TGF-beta signaling (By similarity).
-- SUBCELLULAR LOCATION: Membrane; single-pass type I membrane protein (Probable).
-- SIMILARITY: Contains I EBF-like domain.
-- SIMILARITY: Contains I fibronectin type-III domain.
-- SIMILARITY: Contains I LRR (leucine-rich) repeats.
